Dovre Astroline 4CB Cast Iron Stoves

With similar looks to the Astroline 3CB stove, the Astroline 4CB stove is also available in either wood burning or multi fuel versions and with a choice of pedestal or woodstore bases.

Featuring an extensive front window and glass side panels, you are able to enjoy to the full the exceptional swirling flames produced by Dovre's very latest Cleanburnsystem. An external combustion air facility integrated within the stove also helps to reduce draughts in the room as well as improve heating efficiency. And with up to 10kW of warmth, that's a very cosy thought for any winter's night.

- All cast iron construction
- Wood burning or multi fuel stove versions
- Cleanburn and Airwash systems
- Outside combustion air facility
- Nominal heat output: 8kW
