

Dovre 2300CB Cast Iron Fireplace

As a dedicated **wood** burner the Dovre 2300CB is equally at home as a built-in fireplace with a sophisticated convection system as it is in a dramatic inglenook. Open the doors and enjoy the full ambiance of a real fire or close the doors and a sophisticated **airwash** system keeps the glass cleaner for a full view of the flames. With these fireplace features and the inclusion of an aerated baffle for greater efficiency and lower emissions, the 2300CB **wood** burner takes crackling log fires into a new era.

The Dovre 2300CB wood burner is suitable for inglenooks (with optional steel canopy, base plinth and side panels) or as a built-in fireplace.

- All cast iron construction
