

Studio 1 Freestanding Wood Burning Stove

The Stovax Studio 1 Freestanding incorporates the impressive firebox performance of a wood burning inset fire with the welcoming presence of a stove. Available with a number of optional extras to help you create the right look for your home, the Studio 1 Freestanding wood burning stove can be hearth mounted or installed on a Studio Bench. An optional heat shield kit can be fitted to the bench in order to reduce the distance to combustible materials if required.

Other styling options include a black glass top plate, gloss black enamel flue pipe, square section flue covers and flue ring covers, all of which are designed to provide an integrated and cohesive look to your new stove.
