

Stockton 8 Slimline Wood Burning Stoves & Multi-fuel Stoves

Stovax's Stockton 8 Slimline is 3" (75mm) shallower than the standard Stockton 8; this means that in many cases less building work will be required to install the stove as it could slot directly into your existing fireplace opening and, although smaller, will take logs up to 15¾" (400mm) long. Available as a two door version the Stockton 8 Slimline is a dedicated woodburner but can also burn multi-fuel when fitted with a multi-fuel kit.
